

# TransportACE™ with CoPilot Live™ Professional & Xata Turnpike A Next Generation Mobility Solution for Fleet Operations

**Unbolt your drivers from the cab!** Apacheta TransportACE™ goes beyond legacy macro-driven messaging solutions to provide powerful workflow support to streamline your fleet operations. TransportACE is a flexible proof-of-delivery application that ensures compliance with your business processes, inside the cab or out.

**Free your fleet from vendor lock-in!** TransportACE supports a wide array of mobile devices, allowing you to choose the hardware vendor that best meets your needs. TransportACE also integrates seamlessly with best-of-breed navigation, compliance, and transportation management solutions to offer an easy-to-install package that is significantly less expensive than traditional black box solutions.

## TransportACE allows companies to:

- » Streamline mobile fleet operations
- » Track proof-of-delivery in real-time
- » Minimize risk and increase driver safety
- » Reduce time dispatcher spends messaging & calling drivers
- » Ensure compliance with DOT regulations
- » Improve driver and route efficiency
- » Collect data to measure KPIs
- » Lower fuel costs

## TransportACE offers:

### Flexible Mobile Workflows

- Load verification
- Real-time delivery status
- Proof-of-delivery
- Ability to attach pictures to condition reports
