

CoPILOT[®] TRUCK[™]

CoPilot Truck In-Cab Navigation

Trusted by Over 100,000 Truck Drivers Daily
to Keep Them Safe, Compliant and Efficient.

Empower your drivers with a highly accurate GPS navigation solution designed to keep them safe and compliant on the road. CoPilot Truck In-Cab Navigation is a feature rich, cost-effective solution that provides fleets reliable truck-specific routing to run efficiently while staying connected to the cab to maintain true route compliance.

The Benefits

- ➔ **Improve driver safety and driver satisfaction** by providing safe and reliable guidance throughout the planned route
- ➔ **Lower fuel costs** by reducing out-of-route mileage by 7-10% on average
- ➔ **Reduce risk of costly bridge strikes and collisions** with truck-legal routing
- ➔ **Maximize fleet-wide productivity** with streamlined communication from the back office to the cab
- ➔ **Boost route compliance** by monitoring drivers adherence to the planned route in real-time and post-trip for deeper analysis
- ➔ **Improve driver retention & recruiting** by providing drivers an effective yet easy to use tool to succeed in their job
- ➔ **Fully customize all aspects of navigation** with over 250 APIs and function calls
- ➔ **Enhance customer service and on-time delivery** with precise, dynamic ETAs

Keep your drivers safe above all else.

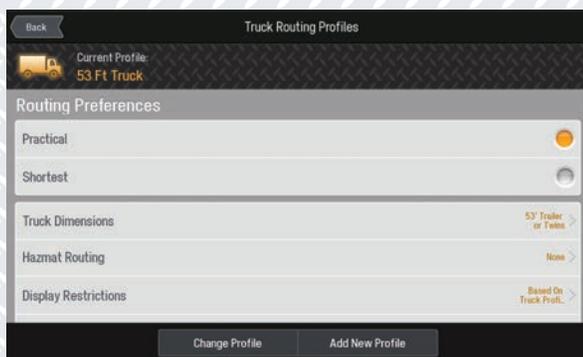

- Safe, accurate industry standard PC*MILER truck-specific routing
- Familiar, driver-friendly user interface featuring visual and audio guidance for ease of use
- Voice-guided, turn-by-turn directions with spoken street names from origin to destination
- Clear 3D and 2D map views plus Driver Safety View for at-a-glance instructions to reduce driver distraction in the cab
- Motion Lock to prevent interaction by driver when vehicle is in motion

Advance notice of upcoming lane changes with lane assist guidance with road signage and unique ClearTurn™ view

Keep your drivers compliant on the road.

- Detour function quickly identifies an alternate truck-legal route
- Posted speed limit display plus audio and visual alerts notifying a driver when they've exceeded the limit
- Safely maneuver lane changes with real road signage and lane assist guidance plus our unique ClearTurn view

Save multiple pre-defined and custom truck routing profiles based on vehicle size/class to ensure safety and compliance to regulations

Keep your fleet efficient with lower miles and optimal fuel usage.

- On-board navigation for constant access to reliable routing and maps in out of coverage areas
- Fast, automatic route generation and re-calculation, when needed, directly on the device
- Seamless integration with Workflow and Dispatch applications to prevent erroneous address entry and reduce driver stress
- Ability to drag the route directly on the map to better suit the driver's needs
- Streamlined route entry by selecting an address, geocode or a destination directly on the map
- Build single or multiple destination routes and optimize up to 50 stops
- Practical and Shortest routing options available
- View 3 alternate routes with distance and trip time for each
- Intuitive user interface requires minimal driver training and reduced on-boarding of new drivers
- Over 7 million POIs including truck-specific POIs, for everything a driver needs on the road

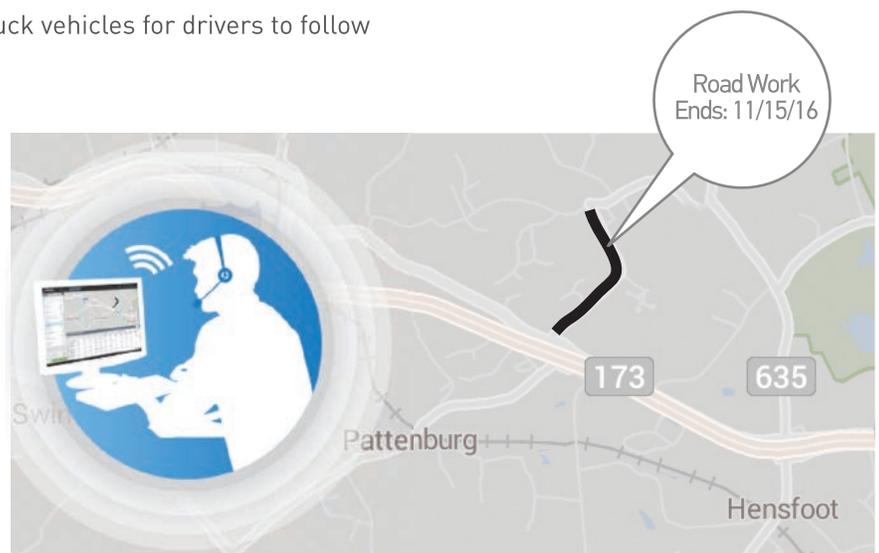

30 years experience building PC*MILER industry standard truck routes

Keep the back office connected to the cab.

Use CoPilot FleetPortal™ to streamline management of CoPilot Truck with remote configuration by Fleet Managers from the back office.

- Define routing profiles and assign them to the cab for drivers to follow
- Ability to create and manage custom POI sets and send them to CoPilot Truck
- Provides map version visibility to easily identify which trucks need updates for fleet-wide consistency
- Send PC*MILER Avoid/Favors* to CoPilot Truck vehicles for drivers to follow

Quickly update your fleet with road closures

*Requires PC*MILER|Streets license

Stay way ahead with these CoPilot Truck add-ons:

CoPilot Truck Route Compliance

Monitor driver adherence to the planned route from the back office for true route compliance.

- ➔ Receive back office notifications when a driver leaves the prescribed route by more than a pre-defined distance
- ➔ Receive back office notifications when the driver returns to the prescribed route
- ➔ Visualize planned vs. actual routes directly on the map at a fleet-wide level or drill down to each route
- ➔ View a post-trip summary of all out of route events with vital data points including planned vs. actual distance to monitor fuel consumption

CoPilot Truck Energy

Safely navigate directly to the well head site with North America's most detailed off-road mapping service*.

- ➔ Voice-guided, turn-by-turn directions across one million private oil and gas lease roads and growing
- ➔ Search and route directly to oil and gas Points of Interest including well sites, facilities and public land survey coordinates

CoPilot Truck HazMat

- ➔ Load-specific routing for 7 variations of Hazmat categories

* Web-based oil and gas field mapping powered by GEOTrac

RouteSync

Know your drivers are driving the exact compliant, cost-effective route you planned.

- ➔ Send the exact PC*MILER planned route from the back office directly to CoPilot Truck for the driver to follow
- ➔ Maintain consistency with PC*MILER back office operations and account functions
- ➔ Deliver the guidance to drive the miles that are being billed
