

Route Visualization & Reporting Tool

Connecting the back office to the cab is critical for a successful deployment of in-cab navigation.

With our web-based fleet management tool, CoPilot FleetPortal*, Fleet Managers have greater visibility of the actual routes executed so drivers can stay focused on the road.

The Benefits

- ➔ **Improve back office communication** for greater safety and productivity fleet-wide
- ➔ **Lower fuel costs** associated with off route mileage and idle time
- ➔ **Ensure compliance** by monitoring drivers adherence to the truck-legal planned route
- ➔ **Limit the need for driver interaction**, minimizing driver distraction and risk of fines and collisions
- ➔ **Improve driver performance** with post-trip detailed insight into routes executed in-cab

*CoPilot Truck navigation license is required

Remote Configuration & Management Tool

Streamline management of CoPilot Truck In-Cab navigation with web-based remote configuration tools for Fleet Managers.

- ➔ Provide drivers timely updates of road closures
- ➔ Define routing profiles and assign them to the cab from the back office
- ➔ Create and manage custom POI sets and send them to CoPilot Truck
- ➔ Identify which trucks need map version updates for fleet-wide consistency
- ➔ Send PC*MILER Avoids/Favors* to CoPilot Truck for drivers to follow

Remotely configure and assign routing profiles based on vehicle size and load type for tighter control over the route a driver follows

Quickly update your fleet with road closures

*Requires PC*MILER/Streets license

CoPilot Truck Route Compliance

Monitor driver adherence to the planned route to maximize operational efficiency.

- ➔ Receive back office notifications when a driver leaves the prescribed route by more than a pre-defined off route threshold
- ➔ Receive back office notifications when the driver returns to the prescribed route
- ➔ Visualize distance and time deltas directly on the map at a fleet-wide level or drill down to each route
- ➔ View a post-trip summary of all off route events with the vital data points, including planned vs. actual distance to monitor for variable cost management

Planned Distance (mi)	Actual Distance (mi)	Distance Delta (mi)
88.23	81.46	-6.8
64.51	71.76	7.2
178.41	190.68	12.3
37.17	56.83	19.7

NOTE: CoPilot Truck Route Compliance is an additional add-on service option available for use with CoPilot Truck. Contact your account representative for details.
