

CoPILOT® TRUCK™

CoPilot Truck In-Cab Navigation

Trusted by Over 300,000 Truck Drivers Daily

Empower your drivers with a highly accurate GPS navigation solution designed to keep them safe while on the road. CoPilot Truck In-Cab Navigation is a feature rich, cost-effective solution that provides fleets with reliable truck-specific routing.

The Benefits

- ➔ **Create truck profiles** with the exact physical dimensions and load
- ➔ **Generate efficient truck routes** specifically for the profile set
- ➔ **Improve driver safety and satisfaction** by providing safe reliable guidance throughout the planned route
- ➔ **Lower fuel costs** by reducing out-of-route mileage by up to 10%
- ➔ **Reduce risk of costly bridge strikes and collisions** with truck-legal routing
- ➔ **Improve driver retention & recruiting** by providing drivers an effective yet easy to use tool to succeed
- ➔ **Fully customize all aspects of navigation** with over 250 APIs and function calls

Keeping your drivers safe

- ➔ Non-distracting, driver-friendly user interface
- ➔ Voice-guided turn-by-turn directions with spoken street names from origin to destination
- ➔ Clear 3D and 2D map views plus Driver Safety View for at-a-glance instructions to reduce driver distraction in the cab

Advance notice of upcoming lane changes with lane assist guidance with road signage and unique ClearTurn™ view

Keeping drivers road compliant

- ➔ Detour function quickly identifies an alternative truck-legal route
- ➔ Posted speed limit display plus audio and visual alerts notifying a driver when they've exceeded the limit
- ➔ Safely manoeuvre lane changes with real road signage and lane assist guidance plus our ClearTurn view
- ➔ Hazmat routing based on Hazmat categories and ADR tunnel codes

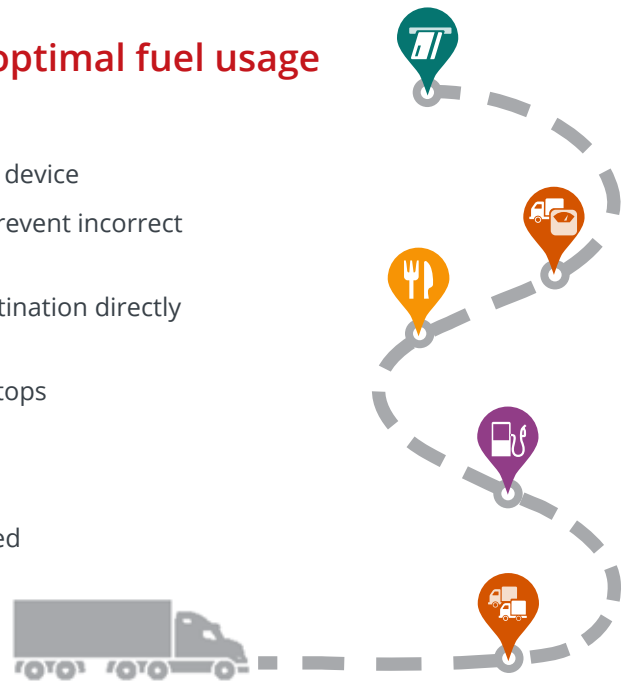

Save multiple pre-defined and custom truck routing profiles based on vehicle size/class

Keeping fleets efficient with lower miles and optimal fuel usage

- ➔ On-board navigation for constant access to reliable routing
- ➔ Fast, automatic route generation and re-calculation directly on the device
- ➔ Options to integrate with Workflow and Dispatch applications to prevent incorrect address entry and reduce driver stress
- ➔ Streamlined route entry by selecting an address, geocode or a destination directly on the map
- ➔ Build single or multiple destination routes and optimize up to 50 stops
- ➔ Practical and Shortest routing options available
- ➔ View three alternate routes with distances and trip time for each
- ➔ Intuitive user interface requires minimal driver training and reduced on-boarding of new drivers
- ➔ Truck specific POIs including Fuel and Rest Stops

Integrated, truck-specific GPS navigation

With options to integrate with leading transport management and mobile worker line of business applications, CoPilot Truck provides efficient routes based on vehicle profile dimensions and load type.

CoPilot Truck provides navigation across the fleet including options for medium duty vehicles used for frequent stop delivery.

A comprehensive Software Developer Kit (SDK) enables complete, corporate customization of the driver's navigation. Integrated with leading telematics systems, it also allows Back Office support services to automate and update a driver's schedule, reviewing in real-time data feeds such as current location, truck speed and next stop ETA.

Platform support

CoPilot Truck is available on Android, Windows Phone, Windows Mobile 6.5, Windows CE and iOS.

MAPS

Consistent Route Optimization and Mapping in the Back Office and on the Device

Built using the same source of commercial mapping and routing data as CoPilot Truck, ALK Maps is a dynamic asset and route visualization platform that can further enhance company mobile workflow.

The combination of the two solutions provides a consistent view of route optimization, mapping and navigation between the driver's device and the back office. This added visibility of real-time, precise data allows the trip to be safely and efficiently adjusted from the back office to best suit changing conditions.

ALK Maps Provides:

Directions & Routing

Interactively plan simple or complex routes using a variety of parameters or route options before and during trips.

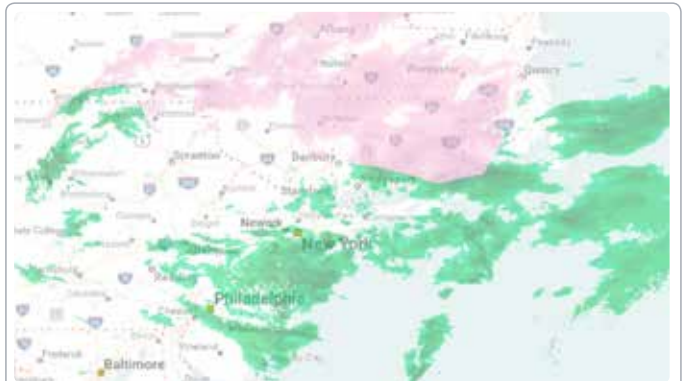

Mobile Asset Management

Quickly track and monitor vehicles and assets in real time.

Geocoding Solutions

Plot and save custom places using latitude and longitudes for more precise routing.

Traffic & Weather Display

Overlay current traffic and weather for daily trip dispatch or utilize historical traffic data for enhanced pre-planning.
